

Project Initialization and Planning Phase

Date	20 th July 2026
Team ID	Akshat oberoï
Project Name	Food Ordering Behaviour Analysis Dashboard (Tableau)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Business Analyst	explore real-time data visualisations of cuisine demand and consumer habits across food ordering platforms	order volume, ratings, delivery time, and revenue are tracked as separate, disconnected views	there is no single interconnected dashboard linking overall corporate KPIs together	unable to see a structured, unified picture of food ordering behaviour and consumer trends
PS-2	A City Operations Manager	identify which cities show strong order volume alongside consistent delivery performance	order volume by city and delivery time distribution are shown as separate charts	there is no combined view linking cities, delivery time, and order type (Alone, Family, Friends) together	unable to tell whether growth in a city is matched by reliable delivery service
